

Questions and Answers

Senior math-based quantitative requirement

1. What is the senior math-based quantitative course requirement?

Students must complete one credit of math-based quantitative coursework in their senior year.

2. What courses can I take?

This requirement may be met by enrolling in any of these math classes

- Algebra I
- Algebra II
- Applied Math
- Geometry
- Pre-calculus
- Statistics

OR ... comparable math college courses such as

- AP Calculus
- AP Statistics
- *College in the High School* math

OR ... by completing an algebra-based science course such as

- Chemistry
- Physics

OR ... by completing math-based quantitative career and technical (CTE) course

NEW: AP computer science qualifies as a math-based quantitative course for students who take the course in their senior year. Students must also be enrolled in Algebra II or have successfully completed Algebra II.

3. Are there any exceptions to taking a math-based quantitative course in my senior year?

Yes. If you complete a higher-level math course such as pre-calculus, math analysis or calculus prior to your senior year, you are exempt from the senior-year quantitative course requirement.

4. Who should I contact if I have questions?

Talk to your school counselor.
