Importance: High

Once again, our weather conditions are such that we cannot safely transport students or operate schools. Our facilities team has been doing heroic work to clear access ways and parking areas, but we don't have enough snow and ice removal equipment to handle an extended series of snow storms and snow and ice accumulations of this magnitude.

A few moments ago our school closure announcements were posted on the website and distributed to the media, and are being sent to families and the public. Again, due to the continuing severity of the continuing weather conditions, we are including in the announcement that the Community Resource Center is closed for business as well.

As on Monday and Tuesday, again I am encouraging you to stay home and off the roads, and to use whatever appropriate leave is available to you to stay home. If you have any questions about leave use, direct your questions to your supervisor or the directors of certificated or classified staff via email or phone. Maintenance and custodial staff again will work as regular a shift as they can, as is normally the case in snow closures. You certainly may travel into work at the CRC if you feel safe doing so; I know our custodial team has been working diligently to get the facility ready for us. In any case, please do take care.

Dr. Gary Cohn
Superintendent
