

## Google Video for AMX and the Website

### Upload video

1. **Upload** video on Google (For district videos go to [EPS Video folder](#))
  - a. **Drag** mp4 video into your video collection folder
  - b. Wait for it to complete Google's integration process
2. **Right click** on video and **set** sharing to *Anyone on the internet can find and view*

### Insert srt File for Captions

1. **Open** video
2. **Click** the three dots and **select** *Manage caption tracks*
3. **Click** *Add New Caption Tracks*
4. Either upload or if already uploaded search and select srt file.
5. **Click** *Upload*

**Note:** It is usually easier to upload the srt file into EPS videos and verify that it is there then attach for captions. Having multiple Google accounts can muddy the direct upload method.

### Video for AMX

1. While MP4 is preferable check [Operations Guide](#) and [Programming Guide](#) other formats, resolution and codec limitations
2. [Video presentation](#) of how to insert video and publish project in foyer
3. Verify publishing - North foyer screen go to <http://10.10.5.54/index.php> and clicking on snapshot

### Getting Embed Code for Video

1. In that sharing dialogue box **click** on Copy Link button
2. **Paste** link in the browser and **click** Enter
3. **Click** the three dots in the top right and **select** Embed item
4. **Copy** the code that appears

### Embed on website

1. **Open** Site Manager and **navigate** to the page that will contain the video
2. **Open** the page in the editor
3. **Click** on the <> symbol to see html code
4. **Find** the code that contains <iframe>....</iframe>
5. **Remove** that code
6. **Paste** in the embed code you copied in its place
7. **Save**

You may need to adjust the width and height in the code and you may want to put a link on the page that goes directly to the video, as well as the embed.
