

Quadrilaterals

A quadrilateral is a polygon that:

has four sides. 	has four vertices. 	has four angles. 
--	---	---

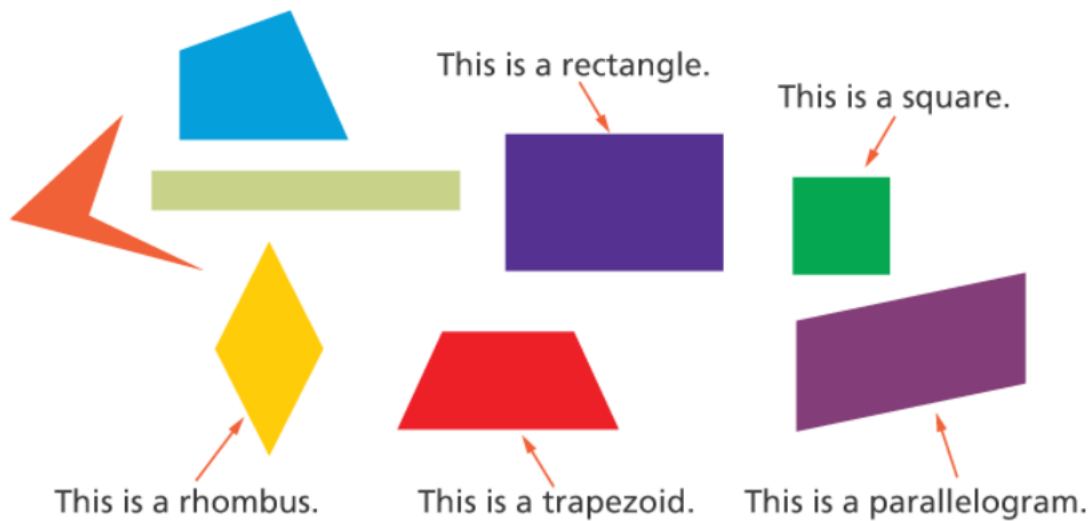

Which of these figures are quadrilaterals?
Why do you think so?

Circle the quadrilaterals.

Quadrilaterals

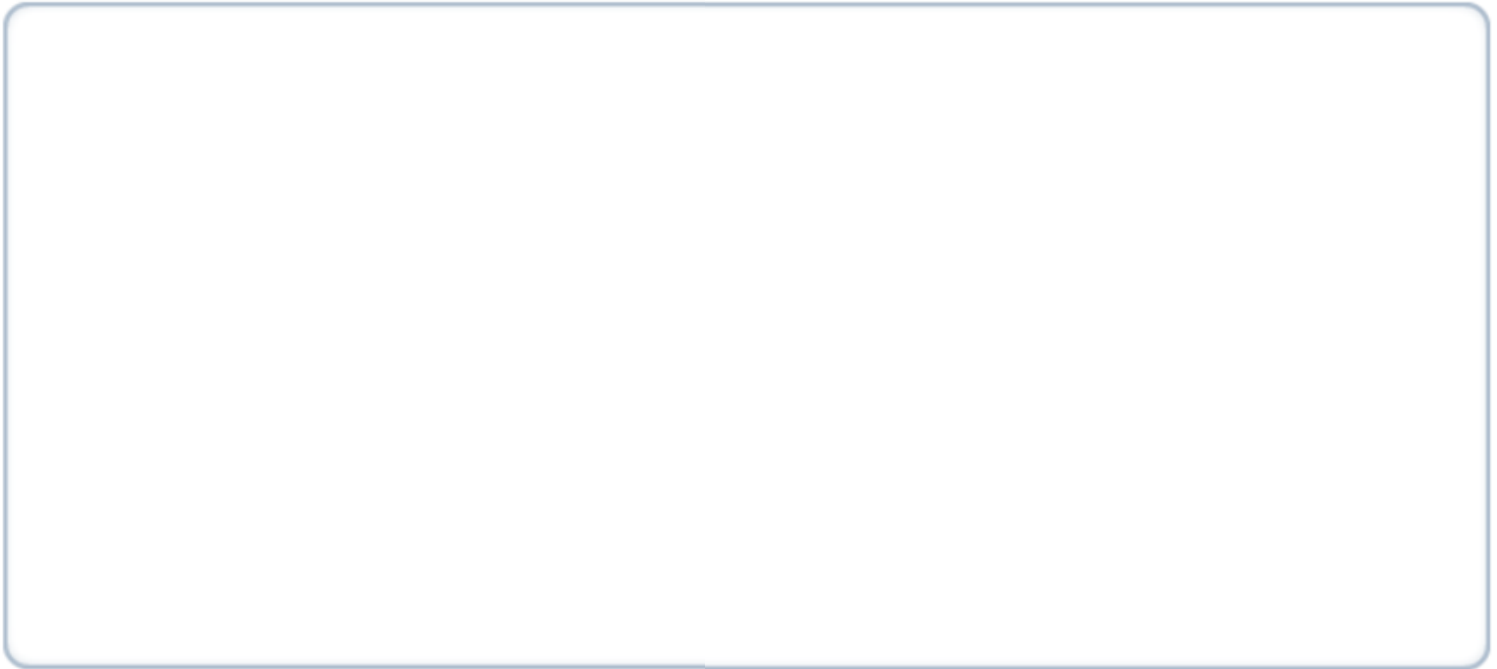

All of these figures are quadrilaterals.
Some quadrilaterals have other special names, too.

Try It

Draw some quadrilaterals and some shapes that are not quadrilaterals.

Quadrilaterals

Not Quadrilaterals
