

## Importing Course Content- Example (LTI or Redirect Links)

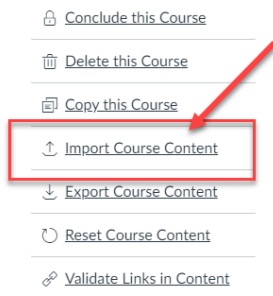

The Import Course Content Tool can be used to copy LTI or Redirect links or any other content from one Canvas course to another.

Follow the steps below to copy your LTI or Redirect links to another course:

1. Navigate to the course that you want to copy the links into.
2. Select “Settings” from the Course Navigation Menu.

3. In the settings menu select the “Import Course Content” tool from the menu on the right.

4. From the “Import Content” window;
  - a. Content Type- Copy a Canvas Course
  - b. Search for the course you are copying from (or you can prep ahead and copy title of course and paste)
  - c. Choose- Select Specific Content (this allows you to copy certain items without copying the entire course)
  - d. Select “Import”

### Import Content

1 Content Type

2 Search for a course   
☒ Include completed courses

Content ☐ All content ☒ Select specific content

Options ☐ Adjust events and due dates

4

5. From the Select Content window select “External Tools” and choose the LTI or Redirect links you want to copy.
