

College and Career Readiness Seminar Course Syllabus

Everett Public Schools Strategic Plan Alignment

Priority Student Outcome: Ensure students are prepared to succeed in college and career
Objective B.2: Establish personalized learning opportunities for all students

College and Career Readiness Seminar

College and Career Readiness Seminar (CCRS) will challenge students to explore, develop, and take steps toward their own postsecondary plans. In this course, students will complete their High School and Beyond Plan and focus on collaborative projects focused on solving real-world problems. Students will use online tools, such as Naviance, Canvas, and EverFi to complete the course outcomes.

Units Covered within CCRS:

Planning my Pathway
Financing Education & Training
Obtaining Employment
Adulting 101

High School and Beyond Plan

In CCRS, students will complete their High School and Beyond Plan. The High School and Beyond Plan is a state and district graduation requirement. Upon successful completion of the course with a passing grade, the High School and Beyond Plan will be marked "MET" on the student's high school transcript.

Graduation Requirement

CCRS is a district-required class for high school graduation. It fulfills the district graduation requirement and allows students to earn CTE credit. Students may take the course in their senior year or in the spring of their junior year.

Grading

Students and parents can access grades online through the LMS system. For information or to log in, go to <http://lmsinfo.everettsd.org>.

This course will be assessed based on the following components:

Planning My Pathway Completion of unit assignments exploring post-secondary options, including the High School and Beyond Plan Survey
Financial Literacy Completion of unit assignments using EverFi curriculum.
Obtaining Employment Completion of unit assignments exploring career interests and preparation for future employment.

- Flash drive (optional)
- Headphones (optional)

Essential Skills

To be college, career, and life ready, students need to be able to integrate and apply 21st century skills, as well as core academic and technical knowledge as they prepare for the post-secondary. The 21st Century Skills standards adopted by the State of Washington, developed from the Partnership for 21st Century Skills organization refer to the knowledge, life skills, career skills, habits, and traits necessary for success in today's world. The skills focused on creativity, critical thinking, communication, and collaboration are essential to preparing students for complex lives and work environments in our global economy.
