Trichomoniasis	Hepatitis B	

True or False?

Sexually Transmitted Infections can be found in all of the following bodily fluids.

- Blood
- Ejaculate
- Pre-ejaculate
- Vaginal fluid
- Breast Milk

HIV/AIDS Information

HIV	AIDS
Stands for Human Immunodeficiency Virus	Stands for Acquired Immune Deficiency Syndrome
HIV can weaken the immune system over time to the point that the system has difficulty fighting off infections. Infections are usually controlled by a healthy immunity system, but they can cause problems or even be life-threatening in someone with AIDS.	

Sexually Transmitted Infections: Truths

- **1.7 million people are living with HIV** and almost one in five don't know they are infected.
- **Getting a blood test** is the first step to finding out if you have HIV.
- **According to the CDC,**

There were **37,968 NEW HIV DIAGNOSES** in the US and dependent areas in 2018. Of those, 21% (7,891) were among youth.

Getting medical care and taking medicines regularly helps a person with HIV live a longer and healthier life. It also can lower the chances of passing HIV on to others.

Sexually Transmitted Infections: Truths

- **Abstinence**, when practiced correctly and consistently, is the only 100% certain way to avoid STI transmission.
- **Latex or polyurethane** that covers the penis during vaginal, anal or oral sex. When used correctly and consistently, condoms are 98% effective at preventing STIs and pregnancy.

HIV Transmission

Four forms of high-risk sexual behaviors that carry the highest risk of HIV transmission:

- **Anal sex** carries the highest risk of HIV transmission.
- **Vaginal sex** has the second-highest risk.
- **Oral sex** follows distant third.
- **Sharing needles and injection equipment** falls in between the risks for anal sex and vaginal sex.

According to the Center for Disease Control (CDC)

- When a person is drunk or high, they are more likely to take risks such as having sex without using a condom.

of sexually active high school students drank alcohol or used drugs before their most recent sexual intercourse

How are all STIs Preventable?

- Getting tested
- Using protection
- Healthy Relationships
- Communication
- Sequential/monogamous partners
- Abstinence
