Secondary Math Curriculum Adoption Virtual Open House March 7-11

Precalculus, AP Calculus and AP Statistics

Everett, WA--Everett Public Schools is currently engaged in a curriculum adoption process for Precalculus, AP Calculus and AP Statistics. Throughout the process, the Mathematics Adoption Committees have engaged in utilizing all the rigorous steps provided in Everett Public Schools [curriculum adoption procedure 2311P](#).

Throughout the process, the committee has reviewed several different curricular resources to identify the degree to which lessons and units are designed for the 4th course Common Core State Standards, Standards for Mathematical Practice, as well as alignment with community college equivalency, or AP College Board Standards. They have also specifically looked for bias, usability by diverse learners and the ability to support blended learning environments.

In their process, the committee intentionally looked for instructional materials that would change both the instruction of mathematics and the student experience. After looking at several options, the committee moved forward with materials that would do both, while promoting equity and access to these courses.

Please go to www.everettsd.org/math to explore the curriculum and assist the committee with the final recommendation before it is presented to the school board on April 19.
