

IM Implementation Leaders

To support IM Implementation, we meet monthly with IM Implementation Leaders. The IM Implementation Leaders are comprised of a representative from every grade level at every building, the building-based math coaches and a special education teacher from each site. In addition, we invite principals and assistant principals to join the Implementation Leaders meetings.

The role of the IM Implementation Leaders is to be a take the learning from our meetings back to their grade level PLCs/sites to improve the overall understanding of and implementation of IM.
