

Transit in 2024

Provide feedback on the proposed 2024 transit network!

Based on earlier feedback, we are proposing an updated network that includes:

- New routes and new neighborhoods on existing routes
- More frequent bus service with the new Swift Orange Line and additional local routes
- More bus service late at night, especially for connections to light rail stations
- Freeway-based express service to light rail stations in both Snohomish and King counties

Provide your feedback by May 31

Please visit our online open house to review the 36 proposed routes in more detail. Each route has a map and description of proposed changes.
