

Procedure 6950P Public Works Contractor Assurances and Change Orders

Revisions align the language regarding the bid bond threshold with current public bid limits, and to the recently amended RCW that allows a contractor the option to have the district retain 10% of the contract amount to cover both retainage and performance and payment bonds for projects up to \$150,000. Additionally, the threshold for retention has been revised to align with the internal Facilities and Planning department policy of drafting contracts for any project of \$25,000 or larger.
