Technology

Estimated project cost	$96,000,000
Estimated final completion date	Ongoing

The Technology Levy centers on six key areas. Within each of these areas are critical elements that support technology-rich instructional resources and a robust infrastructure essential to leverage technology in reaching the Strategic Plan goals. Over the six-year implementation of the $96 million technology levy, the district will be able to sustain the 1:1 program, enhance our infrastructure, provide professional development, and support and continue integrating technology into the operations and instruction of the district. The levy will put into action the Integrated Technology Plan and build out a sustainable model for advancing staff skill in leveraging technology for learning in partnership with our community, family, students, and staff.

Project: 1:1 program support and life cycle management (maintain 1:1 program by ensuring student and teacher devices stay updated, supported, and properly managed)

Updates:
February 1, 2023: Replaced 4,200 high school laptops at Jackson HS and Cascade HS. Preparing for Chromebook replacements at Eisenhower MS, Evergreen MS, and Heatherwood MS.

_____

Project: Building-based technology life cycle management and upgrades (Ensure classroom and building technology stays updated and capable of current and future needs)

Updates:
February 1, 2023: Replaced classroom projectors with interactive flat panels in all secondary 600 classrooms.

_____

Project: Infrastructure life cycle management and upgrades (Ensure district's technology infrastructure stays updated and capable of current and future needs)

Updates:
February 1, 2023: no update currently.

_____
