

After School STEM Academy

What is ASSA?

Over three cycles throughout the school year industry volunteers and school hosts spend four weeks leading After School STEM Academy's 90 minute lessons for students in 3rd - 6th grade.

ASSA provides an opportunity for students to practice important 21st Century skills for success: creativity, communication, collaboration, and critical thinking.

Students explore new career pathways at no cost to families or schools!

Spring 2023
