

## How are my students' lesson paths adjusted after subsequent Diagnostics?

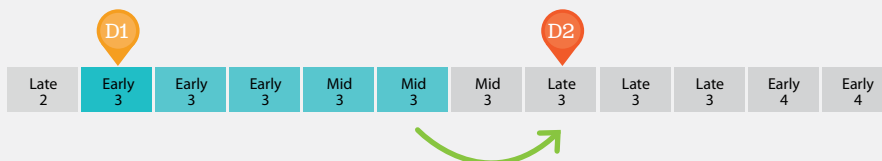

### Overview

Once a student completes a subsequent Diagnostic assessment, *i-Ready* will use the new data to determine whether the student's domain-specific online lesson path needs to be adjusted. One of the following scenarios\* will occur for each domain in which the student is assessed.

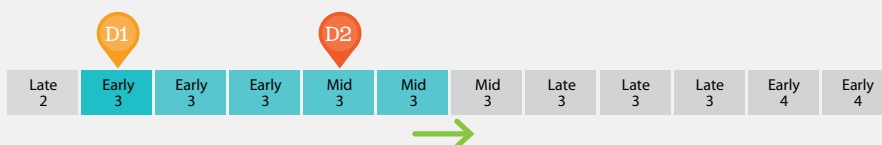

*\*Note: If you adjust a student's lesson path, please review student placement after the subsequent Diagnostic to ensure upcoming lessons are appropriate and remain reflective of the Personalized Instruction they have already completed in that domain.*

### When the student's performance in a domain on a subsequent Diagnostic is **THE SAME OR HIGHER** than on the first Diagnostic:

- A** If the student has not yet reached that level in Personalized Instruction, the student will **JUMP AHEAD** for that domain on their lesson path.

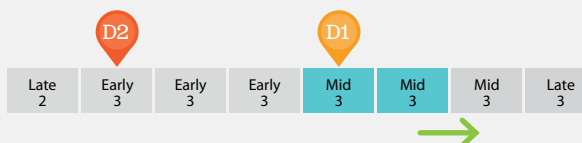

- B** If the student has already worked beyond that level in Personalized Instruction for that domain, the student will **STAY THE COURSE** on their lesson path.

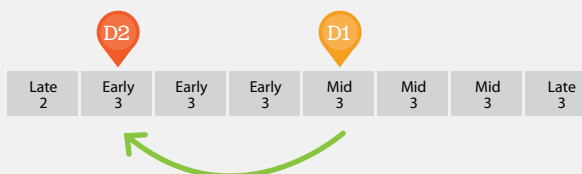

### When the student's performance in a domain on a subsequent Diagnostic is **LOWER** than on the first Diagnostic:

- C** If the student has already worked beyond that level in Personalized Instruction for that domain, the student will **STAY THE COURSE** on their lesson path.

- D** If the student has never started Personalized Instruction in a domain, the student will start Personalized Instruction at the level the subsequent Diagnostic places them. (Their starting point will **MOVE BACK** on their lesson path for that domain.)

#### KEY:

- First Diagnostic placement
- Subsequent Diagnostic placement
- Not completed Personalized Instruction lessons
- Completed Personalized Instruction lessons
- Personalized Instruction lesson path starting point after the subsequent Diagnostic

Are your students using **Direct to My Path**? For support with My Path placement when using Direct to My Path before the initial Diagnostic, see these FAQs for support: [Grade K](#) | [Grades 1-8](#).
