

# Can You Guess?

**You need:**

Three to four players

Deck of cards (remove face cards) or Number Cards (1 – 10)

Player A deals stacks of cards (one stack to each player, facedown) to Players B and C. Players B and C take the top card and, without looking at the cards, hold it numeral side out, on their foreheads. Player A looks at the two cards and tells the sum of the two numbers. Players B and C look at each others cards and try to guess the card on their forehead. If you guess the number correctly, you get to keep the card.

\*\*Version 2: Add one more player to the group. Player A deals to the three players, and asks each to take the top card and hold it on their forehead. The dealer then gives the sum of the three cards and the three players try to guess their individual cards.
