

TIC-TAC-TOE PRODUCTS

Object: Be the first team to get 4 products in a row (horizontally, vertically, or diagonally).

Divide into 2 teams (X's and O's).

1. Team O selects two factors by placing a marker on the numbers (1-9) to multiply. The product is circled by placing an O on the grid.
2. Team X then moves one marker to make a new product and place an X on the grid.
3. Teams alternate moving one marker at a time and continue placing X's and O's until a team has marked four products in a row.
4. After several games, players should discuss their new strategies.

1	2	3	4	5	6
7	8	9	10	12	14
15	16	18	20	21	24
25	27	28	30	32	35
36	40	42	45	48	49
54	56	63	64	72	81
