

Always put your “golden” copy school supply list here and use the same link when you highlight the supply list in announcements

On the district page under “parent tools” we produce a composite list of all schools’ supply lists. We pull that composite from your “golden” copy which should reside in the same place under ‘our school’ on your individual websites.

Each fall, you can add an “announcement” notice about your supply list. Just be sure you use the “golden” link – and that you update your “golden” link each year.
