Just the Facts

→ Tomatoes originated in South America. They were harvested as early as 700 A.D. by the Aztecs and Incas.

→ You can ripen tomatoes by putting them in a paper bag with another ripe tomato.

→ Cold temperatures stop tomatoes from ripening and lessen their flavor. They should be stored at room temperature, not in the fridge.

→ Tomatoes are good sources of Vitamin A, Vitamin C, and fiber.

→ Tomatoes are the world's most widely grown vegetable.

→ Tomatoes are cousins of the eggplant, red pepper, and potato.

Did You Know?

This month on the school menu you can enjoy TOMATOES in:

- The garden spot
- Mama Mia's Spaghetti
- Lasagna
- Salsa with tacos

← Many of the tomatoes we use at school are from local sources. The red dot on the map shows where we get our fresh tomatoes (Eastern Washington). The yellow dot shows where we live!

Activity: Tomatoes

← Tomatoes grow on vines. They start out green and then turn red.

Color some of the tomatoes **green** and some **red**.
