Board approves elementary boundary revisions for fall 2019

Boundary plan creates service area for new elementary and helps reduce overcrowding

At its June 19 meeting, the school board [approved elementary boundary revisions for fall 2019](#) which include the Elementary Boundary Committee's recommendation to the superintendent with the inclusion of one adjustment that shifts the southern boundary of Forest View Elementary School. The additional adjustment better communicates the boundary committee's intent that driveways exiting on the south side of S. 156th Street go to Forest View.

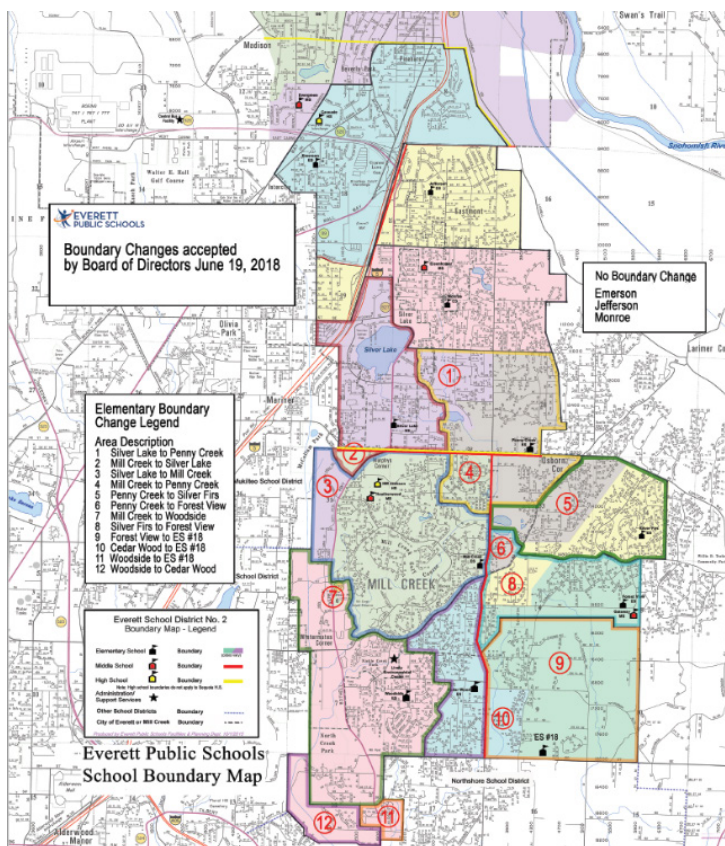

It is estimated 1,370 current students will move to a different school with approval of this boundary revision in fall 2019 when [Elementary No. 18](#) opens. The revisions are designed to create a service area for Elementary No. 18 and help to balance overcrowding of elementary schools in the south region of the district.

Finalizing elementary boundaries before school is out, instead of next fall, allows families and schools even more planning and transition time for fall 2019.

Background

In April 2016, voters said "yes" to building a new elementary school to help alleviate overcrowding in the district's southern region. Elementary No. 18, under construction now at 180th Street SE, will open in fall 2019.

The [Elementary Boundary Committee](#), including parents and staff, began work in November 2017 to draw boundaries for the new school and to adjust boundaries for elementary schools in that region to balance school enrollments. The committee studied student enrollment and school capacities and used that information to develop its recommendation for the superintendent on new school boundaries. The committee collected input online through May 25, which the superintendent considered in developing his final recommendation.

—more—

The superintendent's recommendation made two adjustments to the Elementary Boundary Committee's recommendation based on additional community input and a long term perspective of enrollment trends over the next 10 years: 1) move Area 4, located just south of 132nd Street SE along 35th Avenue SE, back to Mill Creek Elementary School and 2) shift the southern boundary of Forest View to better align with the boundary committee's intent that driveways exiting on the south side of South 156th Street go to Forest View. The board accepted only one of these two proposed revisions in its final decision—*it did not approve moving Area 4 back to Mill Creek Elementary School.*
