

## Zoweetek Personal Voice Amplifier One-Page Guide

The Zoweetek Voice Amplifier comes with a headset microphone and cable, speaker, charging cable, wall plug, and shoulder strap. This unit will help project your voice in the classroom or in the hallways.

When using the speaker, you can clip it to a belt or use the strap to wear it however you prefer.

The Zoweetek speaker takes 3-5 hours to charge. A full charge provides up to 12 hours of use. You can charge the amplifier using the included charging cable and wall plug. When charging, you'll see a small red light blinking on the top of the speaker near the controls. Note that the charging cable goes into the smaller port on the side of the speaker.

To use the unit, plug the headset cable into the **MIC** port on the speaker. Be sure the cable is completely plugged-in to the **MIC** port. Power on the speaker by slowly turning the volume wheel from the **OFF** position towards the **ON** position. You'll see a blue light on the top of the speaker showing that it is on.

Note- the **Volume/Power** wheel only needs very small adjustments to raise or lower the volume. Turning the volume up too high could lead to feedback or squealing during use.
