

2025-2026 Middle School Course Catalog Highlights

New Courses

671MTH Modified Math 6

In Modified Math 6, students focus on accessing four critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; and (4) developing understanding of statistical thinking. Students engage in learning with grade level curricular materials, working in large groups, small groups, and independent settings throughout this yearlong course.

771MTH Modified Math 7

In Modified Math 7, students focus on accessing four critical areas: (1) developing understanding of and applying proportional relationships; (2) developing understanding of operations with rational numbers and working with expressions and linear equations; (3) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; and (4) drawing inferences about populations based on samples. Students engage in learning with grade level curricular materials, working in large groups, small groups, and independent settings throughout this yearlong course.

871MTH Modified Math 8

In Modified Math 8, students focus on accessing focuses on three critical areas: (1) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (2) grasping the concept of a function and using functions to describe quantitative relationships; (3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem. Students engage in learning with grade level curricular materials, working in large groups, small groups, and independent settings throughout this yearlong course.
