1. Using Microsoft Explorer, students should go to the NCRC Test portal from the Favorites list. They should go to the student login site.

2. Have students fill in the login information. The student login and password is typically the student ID number. You should have been sent a student list of the students in the system.

3. Have students go to My Account on the left.

4. Fill out all starred information and save.

Registering Students for a Test

Important Note: This does not have to be done within the 30 minute window. It can be done anytime. “Registering” is equivalent to signing students up for the tests. The next step, “Authorizing,” does have to be done within the 30 minute window. Authorizing is giving students permission to start the test.

Note: Must be done no earlier than 30 minutes before students take the test. (note: students can also do this individually after they login)

1. Log into the testing center. (Your Login is case sensitive)
2. Go to Group Management

Adding a student to a group.

You will need to do this if a student created their own account at the login page. Alternatively you can register/launch the test individually. By adding them to your period group you will be able to include them in your class reports (otherwise you would have to do it individually).

1. Go to group management on the left
