Identifying & Recognizing Numbers

These are the keypads that students use when they check in to eat breakfast or lunch in the cafeteria or login on the computer. Each child will have his/her own ID number to use.

Before children come to school it would be helpful for them to be able to find and identify the numbers on these keypads.

You might begin by counting and touching in order to 9. Then you might name numbers out of order and have your child point to them as you say them. You can also point to numbers and have your child name them. Finally, your child can challenge you by naming a number and asking you to find it or by pointing to a number and having you name it.
