			• Uses place value understanding of properties of operations to perform multi-digit arithmetic including adding and subtracting multi-digit numbers, and multiplying up to four digits by a one-digit number, and multiplying two-digit numbers using and explaining a variety of strategies.			
			Number and Operations - Fractions			
			• Builds fractions from unit fractions by applying and extending previous understandings of operations on whole numbers including solving word problems involving addition and subtraction of fractions referring to the same whole, and multiplication of a fraction by a whole number.			
			• Extends understanding of fraction equivalence and ordering.			
			• Understands decimal notation for fractions and compares decimal fractions to hundredths.			
			Measurement and Data			
			• Geometric measurement: understands concepts of angle and measures angles: recognizes angle measure as additive, and solves addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems.			
			• Represents and interprets data: makes line plots to display data sets of measurements in fractions of a unit; solves problems involving addition and subtraction of fractions by using information presented in line plots.
