Parents, community members, and principals form the Elementary No. 18 boundary committee. Folks from Snohomish County planning dept., along with Everett Public Schools departmental staff in facilities & planning, transportation, data systems, etc. support this committee.

They first met last month to begin developing recommended changes to elementary school boundaries. The changes are needed for the fall, 2019 opening of new elementary no. 18 in the southern region of the district.

The group's recommendations should be finished by the end of May 2018. By October 2018, the board will approve new boundaries. Families impacted by the change will have 11 months to become familiar with their changed school boundaries and the different schools students will attend starting fall, 2019.

Look for community engagement events between February-April, 2018. Go to <http://bit.ly/2B2ci2Q> for more information, dates of meetings, committee members, boundary revision timeline, etc.

By the second week of school, Everett and Sequoia high schools and Garfield, Lowell and Monroe elementary schools became One-to-One, or 1:1. That is, EACH student in those schools now has individual access to an electronic learning device, thanks to voter approval of the 2016 bond and capital levy. And, more devices will be delivered to more schools over coming years until every school is 1:1. [#EPS_FacilitiesFriday](#) [#EPS_BondLevy](#) [#EPS_AlwaysLearning](#)

The 2016 capital bond and levy funded 10 portable classrooms for elementary and middle school growth, and 14 portable classrooms for high school growth. Costs include furniture and equipment, classroom technology, security systems, ramps, stairs, raised walkways, and utility connections.

A series of meetings have been scheduled with key departments to determine the portables needs for the 2018-2019 school year. Two portables have been ordered for Silver Lake Elementary and one for Monroe Elementary and should be installed this spring.

District "asking for bids" to build elementary #18.

In 2016, voters approved a Capital Bond which included the district's eighteenth elementary school north of 180th St. SE, east of Sunset Road and south of 174th St. SE. The two-story school of 78,000 feet will have 28 classrooms for 550 students from kindergarten through fifth grade.

Target completion date is August 2019 – in time for the first day of school that fall. See the plans and follow project updates online at

Two years ago you said "yes" to student safety, school building maintenance, planning for school growth and educational technology. Those projects are well underway; some are completed. Stay tuned to these #EPS_FacilitiesFriday reports. See how we are keeping the promises of 2016's Capital Bond and Capital Levy.

The 2016 bond and capital levy funds safety and security improvements and the district is piloting recommended measures at two elementary schools. Installation has started at Hawthorne Elementary and includes a visitor video intercom system and an access control system. Visitors will be identified by video and 'buzzed' in by office personnel.

Maintenance department 'Carpet Crews' have begun their summer rotation moving from school to school cleaning carpets. #EPS_OurStaffRocks #EPS_FacilitiesFriday

"We have found this team approach using specialized equipment is much more efficient than schools doing them independently," said Mark Toland, operations manager.

"This year we were fortunate to be able to purchase two new riding carpet extractors to replace and supplement our older machines. These new machines also serve as riding vacuum cleaners, making large area vacuum work much more efficient."

Photo: Hawthorne Elementary Head Custodian, Jon Chafe, riding one of the new machines.

The Cascade High School football field turf replacement has truly been a challenge, but there is some activity happening!

There were permitting delays because of the City of Everett's interpretation of the Department of Ecology's new water quality treatment requirements and more recently, our contractor inadvertently made an error on their bond documents that must be corrected before they can proceed with the project.

Cascade Football Coach Shane Keck, administration and facilities staff are working together to come up with the best solution for fall practices.

Currently the plan involves the football team primarily practicing on the baseball outfield with temporary goal posts (we used this plan a few years ago when we installed the track). Ultimately, while the delay is unfortunate, the installation of turf will be a major boon for Cascade High for years to come.

Renovations at North Middle School are getting underway! The library was moved into an existing double portable that's north of the gym and the library space was sub-divided into additional classroom and offices. The special education department, counselors, and nurse will be sharing that space until the renovation is complete.
