

VEGETABLE of the MONTH

Cooking for Kids

Cilantro Lime Grilled Corn

Serves 6, Prep: 20 minutes

If you have extra butter mixture at the end, stick it in the freezer for your next corny meal!

Ingredients:

1 cup packed and chopped fresh cilantro
1 stick unsalted butter, room temperature
½ tsp lime zest
2 tsp lime juice
Kosher or coarse sea salt
6 ears corn, husked

Directions:

1. Chop cilantro, butter, lime zest and juice, and salt in food processor.
2. Heat grill to medium-high. Brush corn with cilantro butter.
3. Lay corn on hot grill, turning occasionally until bright in color and nicely charred, about 10-12 minutes.
4. Brush corn with some of the remaining butter and serve immediately.

Corn by Gail Gibbons

June

The Incredible Edible Corn

Just the Facts

→ Corn is a great source of niacin, pantothenic acid, and folic acid

→ Comes in yellow, black, purple, green, red, white, and blue colors

→ Every ear of corn has an even number of rows.

→ Corn plants typically grow between 7-10 feet tall

→ Each ear has an average of 800 kernels

→ Corn is the biggest crop grown in the U.S., and Iowa and Illinois produce 1/3rd of all the corn in the U.S.

Did You Know?

This month on the school menu you can enjoy CORN in:

- Cooked Corn
- Black bean and corn salsa
- Corn chips in nachos
