

Strategic Target: 5.1a

Subject: STEM Leadership Network (SLN)

12/6/2013

STEM Leadership Team

The STEM Leadership Network (SLN) is meeting this week to continue their collective input on Everett Public School's district-wide STEM program. A clear definition of a STEM student and STEM instruction is the focus of the workshop. Participants will describe the attributes of a STEM student, provide a vision of STEM in the district, and identify and describe the elements that constitute effective STEM instruction. The group has expanded to include a wider range of Everett STEM stakeholders. Everett administrators, industry partners, and instructional facilitators will join the teacher group and provide their connection and voice. The group's feedback will inform a district-wide STEM strategic plan and an Everett STEM instructional framework.
