Subject: CHS Video class experimenting with streaming video **Submitted by:** CL Fender

Strategic Target: 1.5a

Cascade High School's (CHS) Video Production class streamed their first live video broadcast at the varsity girls CHS volleyball game last week. The live stream went very well and the archive of the video is online at <http://www.highschoolcube.com/event/cascade-varsity-volleyball-vs-lynnwood-royals-10-2-325992> . Live streaming is the first step for Cascade's Video Production class to reach out to the community. This is a summative way to extend the classroom learning into the real world and provide a leadership role for the video production students. The class is looking forward to many more broadcasts.
