

Strategic Target: 5.1a

Subject: STEM Leadership Network (SLN)

9/27/13

STEM Leadership Team

In late August the STEM Leadership Network (SLN) held its first meeting. The network is composed of K-12 teachers of math, science, and Career and Technical Education (CTE). Designed as an advisory group, SLN provides input on district STEM vision , pathways, partnerships, and courses. Future membership expansion will include building administrators, community members, and industry.

The kick-off meeting centered on awareness of STEM education and connections to current district program offerings. Subsequent meetings this year will include the development of a 4 year strategic plan, a STEM instructional rubric and budget advisement. The next meeting is scheduled for early December.
