Values Survey Interpretation of Results

Directions: After completing and scoring the survey, please write complete sentences in paragraph form answers while analyzing the results to the following questions. Be careful to use correct punctuation and spelling. You may write legibly or type. You may also use a separate sheet of paper if needed.

1. Please explain the topic of values in general and why they are important to people in making decisions and defining self-image (How they want others to see them).
2. Identify your top 3 values categories and explain why each value is or is not important to you. Use specific examples to back up or justify what you say. Include how this value will affect the decisions you make now and in the future.
3. Please compare the value categories you scored high in with those values of your family and your friends. Evaluate how accurate the survey is for you. And predict if you think the values most important to you now will change or stay the same in 15 years. Explain why.
