

## A diagram of a funnel, represented by a large, wide oval at the bottom and a smaller, narrower oval at the top, connected by two straight lines that converge towards the top. Inside the funnel, there are ten smaller circles arranged in a grid. The circles are organized into four rows: the top row has four circles, the second row has three circles, the third row has three circles, and the bottom row (closest to the narrow top) has a single circle centered between the two converging lines.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is a margin at the top, followed by several rows of writing space. The paper appears to be from a notebook or a standard sheet of stationery.
